## Project

### Development of Convertible Features in Footwear for Therapeutic Application.

Dec 2023 - Present

The "Development of Convertible Features in Footwear for Therapeutic Application" project represents an exciting endeavor that combines innovation with footwear fashion for therapeutic patients. Creation of shoes that transcend the boundaries of traditional footwear. I crafted a convertible shoes that can provide valuable support to therapeutic patients, addressing both their medical and lifestyle needs. This project main motive is to combine an open-footwear and closed-footwear for the usage of the therapeutic patients. It helps to remove the upper and make it to an open type footwear when they feels uncomfortable.

## Education

### B.Tech

Anna University- ACT campus

Jun 2020 - May 2024

Leather Technology

Score - 8.036 CGPA
